Architectural Control & Guidelines (Articles V, VI & VII)

In general, a change to anything about your home that your neighbors can see or may be impacted by, or can be seen from the roadway must be presented to the ACC. If you will have a **dumpster** during construction it **must reside on your property** and not in the street for safety reasons. **Please notify the Association of anticipated length of dumpster presence.**

All items must conform to the general architectural style, colors and materials of the homes in our community and be an asset to the neighborhood. ALL new construction and modifications must also adhere to all state and local building codes.

Example items requiring **Architectural Control Committee (ACC)** review and approval are:

- **Exterior dress of your home:** shutters, paint, brick, siding, gutters, etc.
- **New home construction**
- **Home additions/remodeling**
- **Fences** – Back yard fences must start no closer than 15' from the front of the home, be no more than 6' in height, and of natural unpainted/stained wood color. No chain link fences are allowed. **Waterfront property may also have metal or PVC open view style fence. Specific information on waterfront fences must be supplied to ACC.**
- **Decks**

- **Out/storage buildings** – to be placed behind 6' back yard fence and no more than 9.5' total height from ground. Must comply with Santa Rosa County requirements (see HOA website for information). Copy of county approval required to ACC.
- **Ponds, pools**
- **Driveways/concrete slabs, walkway paths**
- **Landscaping** – All homes are to have grass and bedding areas in front yard. No one shall change the natural contours of the land causing undue and harmful flow of surface water drainage to any adjoining or nearby properties. Drainage easements shall not be obstructed in any way.
- **Waterfront lots** to include **docks, seawalls** and similar items.
